

- Are you the type of person interested in developing software towards emission-free future ?
- Would you like to participate in revolutionizing the energy markets with vehicle batteries ?
- Would you like to use innovative technologies to integrate electric vehicles into the power grid ?
- Would you like to implement machine learning algorithm on big scale ?
- Is your passion to continuously improve your knowledge in a cutting edge open source technologies ?

*Then consider to join us in Munich as a*

## **User Interface Designer**

### **The Mobility House – inspired by zero emissions**

Based in Munich, Germany, The Mobility House is a young and dynamic start up company founded in 2009, and cooperates with all leading automobile manufacturers in over 10 countries. Our charging and energy storage solutions enable the 'Energiewende' and help electric mobility to achieve a breakthrough. Our technologies allow us to integrate electric vehicles into the power grid as an aggregated swarm storage of batteries.

### **What are we looking for?**

#### **Knowledge / Experiences:**

- Bachelor or Master Degree in the field of interface design, interaction design, visual design, computer science
- 3+ years of experience as a UI designer and/or developer
